-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The Amendment filed on December 23, 2004 has been acknowledged.

Request for Continued Examination

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 23, 2004 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 47 is rejected under 35 U.S.C. 102(e) as being anticipated by Miyazawa et al. (US 6,250,750).

Miyazawa et al. discloses all the claimed features of the invention including:

- a carriage (101) for an inkjet printer (column 1, lines 6-8) comprising:
 - a printhead mounting portion (150) configured to secure a printhead (118);
 - an ink reservoir mounting portion (comprises 115, 117) configured to secure an ink reservoir (120), wherein the ink reservoir mounting portion is pivotally coupled to the printhead mounting portion (Figs. 12's) and wherein the ink reservoir mounting portion is configured to pivot a secured ink reservoir about the axis (115, 117 pivot 120 about the pivot attaching 115 to 110, Figs. 12's) between a first position in which the ink reservoir is fluidly connected to a printhead secured to the printhead mounting portion (Fig. 12d) and a second position in which the ink reservoir is withdrawn from the printhead (Fig. 12b).

Allowable Subject Matter

3. Claims 17-20 and 26-46 are allowed.

Response to Arguments

4. Applicant's arguments filed on December 23, 2004 have been fully considered but they are not persuasive.

With respect to new claim 47, Applicants argue that neither Miyazawa nor the prior art of record discloses the claimed subject matter. For example, Miyazawa fails to teach an ink cartridge pivoting about an axis, which is the same axis about which either body (110) or arm (115) pivots.

Examiner's position is that Miyazawa discloses that "the ink reservoir mounting portion is configured to pivot a secured ink reservoir about the axis (115, 117 pivot 120 about the pivot attaching 115 to 110, Figs. 12's) between a first position in which the ink reservoir is fluidly connected to a printhead secured to the printhead mounting portion (Fig. 12d) and a second position in which the ink reservoir is withdrawn from the printhead (Fig. 12b)".

Contact Information

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael P Nghiem whose telephone number is (571) 272-2277. The examiner can normally be reached on M-H.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Barlow can be reached on (571) 272-2269. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
